

**Dear Parents,
Greetings of the day!**

We are delighted to share that -

**“JPS becomes the first CBSE school in Rajasthan starting
an eRadio Station - JPS WeKids Radio”**

It's a unique communication skill development initiative to make students confident speakers on a global platform. With an aim to enhance communication skills and creative thinking ability of students, JPS Jaipur has joined hands with WeKids Radio Network to introduce a unique communication skill program along with an eRadio Station; where JPS students will become RJs and host various shows on a global platform, getting trained under the expert team of WeKids Radio from Mumbai.

- It is a unique skill development initiative by Jankidevi Public school Jaipur, where 'radio' is integrated in the curriculum for the development of students' creativity, communication skills and the art of connecting with an audience as a Radio Jockey. This will equip the young learners to face any audience with confidence.
- JPS will be setting up a radio studio on campus where all students from grade I to X will get an opportunity to host various radio programs. Students are guided by a dedicated expert team of WeKids Radio Network - a renowned educational radio network from Mumbai which works with premium global institutions, featured on various media platforms and a special documentary acknowledged by UNICEF on the World Radio Day.
- The project will help students unearth their hidden talent and express themselves freely. It will build their confidence and act as a stepping stone in building careers in varied new fields in future.

Note:-

1. The classes will be conducted once in 15 days during school timings, which we have already started.
2. The students will be expected to maintain a note book for the same.
3. **There will be no extra charges for the programme.**

**Thanking You,
Regards,**

**Ms. Sumita Minhas
Principal**
